PRESS RELEASE

WASTE-TO ENERGY (AWARD OF SONGKLA WTE PROJECT)

CNIM MARTIN pv. Ltd., ASIAN SUBSIDIARY OF CNIM & MARTIN, TO SUPPLY KEY COMPONENTS FOR WTE PROJECT IN THAILAND

CNIM MARTIN pv. Ltd., the Asian subsidiary of the 2 European leaders in WTE solutions, CNIM and MARTIN, has signed a contract for the supply of the main components of the WTE plant to be built in Songkhla Province, Thailand for TPI Polene Power Public Co Ltd (TPIPP).

Signature of the Contract by CMPL Directors Neelakantan TALARIMBAT (CFO) and Ramesh CHIVUKULA (COO).

CNIM MARTIN PRIVATE LIMITED (CMPL), proudly announces the signature of the contract for the supply of the main components, **Enviropower™** reverse acting MSW incineration grate, **Secolab™** dry Flue Gas treatment system and design of **CNIM WTE Boiler** to the Songkhla WTE project in Thailand.

This signature of this contract is the culmination of the joint efforts of CMPL and its Chinese EPC partner **CHINA NATIONAL ELECTRIC ENGINEERING CO., Ltd. (CNEEC)** to provide customized, competitive and state of the art WTE solutions to the project developer **TPI Polene Power Public Co., Ltd. (TPIPP)** for the design, construction and operation of the Waste to Energy facility located in the province of Songkhla, Thailand.

The Waste to Energy facility envisages 2 boiler lines of 350 TPD capacity each, with a total gross power generation of 12 MW. The fuel is raw Municipal Solid Waste (MSW) with typical waste characteristics of South East Asia, with low calorific value and high moisture content.

For each of the 350TPD lines, a three runs Enviropower™ reverse Acting Martin Grate (Grate specially developed and designed by MARTIN GmbH for Asian type of waste and exclusively licensed to CMPL) and a complete Secolab™ dry flue gas treatment system exclusively licensed by CNIM's subsidiary LAB S.A to CMPL, all localized and industrialized in India by CMPL. These equipment will suitably insure the combustion of the municipal solid waste and maintain and control the environmental emissions as per Thai standard. Regarding boilers, CMPL will supply the basic engineering based on the long time and recognized expertise of CNIM Group for such type of boilers.

"We are delighted by our choice to team up with CMPL for this important project for us and for which CMPL has been able to provide competitive and reliable solutions, suitable for the high moisture and low calorific type of waste envisaged for that project, all that solutions based on their European know-how and reputation. CMPL has been really supportive and responsive, as well as a real plus for us in the discussions we led with our customer TPIPP considering the important background and strong asset of CNIM, LAB and MARTIN that CMPL represents in the region. Strong of this trustful relationship built during the past months, we are now looking forward to further collaborations for other promising WTE projects within the South East Asian Region and beyond.", shared Mr. Pei Wen, General Manager of CNEEC No.6 Engineering Department at the moment of the contract signature.

CMPL is actively supporting the development of WTE projects across South East Asia and beyond (Africa, etc.) following up very closely this emerging market by providing one of the most competitive, established and reliable solution for a proper and large scale municipal and industrial solid waste treatment, which is one of the challenges the fast developing and growing South East Asian countries face.

About CMPL

CNIM MARTIN Pv. Ltd., was founded in 2017 in Chennai, India (Tamil Nadu state), jointly held by CNIM Group, France and MARTIN GmbH Germany. The partnership between the two companies, which has lasted more than 55 years, is significantly strengthened by this cooperation. CNIM MARTIN Pv. Ltd. specializes in the engineering and delivery of turnkey solutions for the thermal treatment of waste in South and Southeast Asia. For this, CNIM MARTIN Private Limited owns exclusive Licenses for waste combustion system, boiler and flue gas treatment technology from both European mother companies with a complete transfer of technology and know-how from MARTIN, CNIM and LAB and complete industrialisation of the same in India. www.cnimmartin.in

CNIM Group is a French equipment manufacturer and industrial contractor operating on a worldwide basis. Founded in 1856, CNIM operates in the Environment, Energy, Defence and High technology sectors. CNIM is a leading European specialist in Waste to Energy (WtE) and Biomass to Energy conversion Projects. CNIM has designed and delivered 173 turnkey waste-to-energy plants (including 292 lines) handling waste generated by more than 110 million people globally. It has also delivered almost 300 biomass-to-energy facilities and more than 450 flue-gas treatment systems. www.cnim.com

MARTIN GmbH is the pioneer in waste combustion. Founded in 1925, MARTIN GmbH has been successfully active – as general contractor, consortium partner, supplier of components or engineering partner – in the field of waste incineration. In 34 countries, more than 1,000 lines of Waste incineration plants are equipped with MARTIN grates. www.martingmbh.de/en/

China National Electric Engineering Co., Ltd. (CNEEC), was established in 1978, born together with the reform and opening-up in late 1970s. CNEEC is a state-owned international engineering company under SINOMACH group, to provide one-stop service of whole value business chain for projects, including consulting, financing, EPC execution, O&M and rehabilitation in the business industry of thermal power, hydro-power, transmission lines, clean energy, environmental protection, municipal utility, industrial and commercial building, mining, transportation, and other industrial projects.

CNEEC currently holds 9 business departments and 27 domestic and overseas branches and has completed more than thousands of projects in 70 countries. "Making Every Project A Milestone", CNEEC has won trust from its customers with advanced technology, reliable quality and excellent services.
